EXHIBIT 1

July 17, 2012
Hertzelia, Israel

Dr. Gafni Keren, MD
Family physician
Clalit, Medical services,
Hertzelia, Israel

To whom it may concern,

I am the Family physician for the Berkovitsh family, Abraham and Luiba, who reside in Israel, the parents of Mordecai Barkan. Following please find a short description of their medical state.

Abraham Berkovitsh, the father, is 91 years old and is in a dire condition. He is bed-ridden, with infusion, under 24 hours observation. He suffers from multiple illnesses and gets numerous medical treatments: Alzheimer, Dementia, psychotic negativism to treatment, heart disease... He receives palliative treatment. He suffers from pressure wounds and uses a special bubble mattress. His condition is deteriorating and he is in terminal state – I would say his days are numbered, he could pass away every day. He has a 24 hours helper to wash him, medicate him, and take care of all his needs – she is not a family member – since his wife cannot take care of him.

Luiba Berkovitsh, the mother, 83 years old, hardly takes care of herself – she suffers from heart disease, Parkinson, diabetics symptoms, high cholesterol – using numerous medications for treatment. She tires quickly and requires help herself, though she makes efforts to minimize her reliance on others. She gets help with cleaning the apartment, buying groceries and medical products, and cooking.

Both need any support they can get – physically and mentally – from family members and others. For any farther details I may be contacted directly at +972-54-5940709..

Dr. Gafni Keren, MD
